

Solution Accelerator: Cloud Migration

www.avolutionsoftware.com

Plan migration of business applications or services to the cloud, understand risk tolerance and security requirements and evaluate current direct and indirect costs vs future cloud associated costs.

The Avolution consultant will work with your team to review the pre-built end-to-end solution comprising of data entry templates, pre-built analysis to evaluate cloud migration options (Retain, Rehost, Repurchase, Re-platform, Refactor, Retire) and pre-built dashboards showing the final cloud migration strategy for applications. The Avolution consultant will guide customers through the implementation of the end-to-end solution over the course of 6 workshops. These 6 workshops ensure an understanding of the Cloud Migration approach and provide an opportunity to refine analysis and outputs based on customer requirements.

Business Outcomes:

- Reduce costs of applications or services by moving to the cloud, improve scalability, flexibility, and Business Agility.
- Create quick time to value with stakeholder-ready interactive dashboards.

Customers will be required to populate data entry and diagram templates using their data. Workshops will be consultant-led 2-4 hours worth of working sessions, with additional work outside of these workshops required by both the customer and the Avolution consultant (highlighted in grey boxes). Standard Use Cases will be implemented over 2-6 months, dependent on availability of data and customer's availability. For best experience, it is recommended that the Avolution consultant is granted access to customer's ABACUS environment. If access cannot be granted, it will be necessary for the customer to screen-share during workshops
