

# Solution Accelerator: Solution Architecture

www.avolutionsoftware.com

Capture Standardized Solution Architecture diagrams that directly leverage and update application and technology portfolios.

The Avolution consultant will work with your team to review the pre-built end-to-end solution comprising of solution architecture structure, diagram viewpoints and templates, work package catalogs and a staging and production architectures. The Avolution consultant will guide customers through the implementation of the end-to-end solution over the course of 6 workshops. These 6 workshops ensure an understanding of the Solution Architecture approach and provide an opportunity to refine analysis and outputs based on customer requirements.

## Business Outcomes:

- Standardized artifacts for effective Architecture Review Board decision-making
- Tracking of requirements and work packages alongside solution design

*Customers will be required to populate data entry and diagram templates using their data. Workshops will be consultant-led 2-4 hours worth of working sessions, with additional work outside of these workshops required by both the customer and the Avolution consultant (highlighted in grey boxes). Standard Use Cases will be implemented over 2-6 months, dependent on availability of data and customer's availability. For best experience, it is recommended that the Avolution consultant is granted access to customer's ABACUS environment. If access cannot be granted, it will be necessary for the customer to screen-share during workshops*
