

Solution Accelerator: Data Privacy & Security

www.avolutionsoftware.com

Incorporate data governance and demonstrate compliance with local and international regulations with consultant guidance.

The Avolution consultant will work with your team to review the pre-built end-to-end solution comprising of data entry templates, pre-built analysis and pre-built dashboards. The Avolution consultant will guide customers through the implementation of the end-to-end solution over the course of 6 workshops. These 6 workshops ensure an understanding of the Data Privacy & Security approach and provide an opportunity to refine analysis and outputs based on customer requirements.

Business Outcomes:

- Use data to visualize and plan, and to calculate how technical investments map to the company’s business strategy
- Quick time to value with stakeholder-ready interactive dashboards
- Data entry templates ready for user contribution

Customers will be required to populate data entry and diagram templates using their data. Workshops will be consultant-led 2-4 hours worth of working sessions, with additional work outside of these workshops required by both the customer and the Avolution consultant (highlighted in grey boxes). Standard Use Cases will be implemented over 2-6 months, dependent on availability of data and customer’s availability. For best experience, it is recommended that the Avolution consultant is granted access to customer’s ABACUS environment. If access cannot be granted, it will be necessary for the customer to screen-share during workshops
