

Solution Accelerator: Mergers & Acquisitions

www.avolutionsoftware.com

Map out and analyze IT, process, and capability implications of mergers and acquisitions.

The Avolution consultant will guide customers through the implementation of the end-to-end solution over the course of 6 workshops. These 6 workshops ensure an understanding of the Mergers & Acquisitions Use Case whilst the Avolution consultant works with your team to review the pre-built end-to-end solution. Data entry templates are readily available for users to begin populating in addition to pre-built analysis which feed pre-built dashboards. This approach also provides an opportunity to refine analysis and outputs based on customer requirements.

Business Outcomes:

- Inform decision-makers on which IT, processes, and capabilities to update, merge, or cut.
- Quick time to value with stakeholder-ready interactive dashboards

Customers will be required to populate data entry and diagram templates using their data. Workshops will be consultant-led 2-4 hours worth of working sessions, with additional work outside of these workshops required by both the customer and the Avolution consultant (highlighted in grey boxes). Standard Use Cases will be implemented over 2-6 months, dependent on availability of data and customer's availability. For best experience, it is recommended that the Avolution consultant is granted access to customer's ABACUS environment. If access cannot be granted, it will be necessary for the customer to screen-share during workshops
