

Solution Accelerator: Custom Use Case Implementation

www.avolutionsoftware.com

The Avolution Consultant will work with you to implement a custom use case, using best practices where applicable.

Customers will be guided through the implementation of an end-to-end solution for their custom use case over the course of 6 workshops. These 6 workshops ensure an understanding of the use case requirements, meta-model configuration and data imports and include tailored analysis and tailored dashboards dedicated to the customer's stakeholders.

Business Outcomes:

- Gain insights and efficiently produce tailored dashboards for any non-standard use case

Customers will be required to populate data entry and diagram templates using their data. Workshops will be consultant-led 2-4 hours worth of working sessions, with additional work outside of these workshops required by both the customer and the Avolution consultant (highlighted in grey boxes). Standard Use Cases will be implemented over 2-6 months, dependent on availability of data and customer's availability. For best experience, it is recommended that the Avolution consultant is granted access to customer's ABACUS environment. If access cannot be granted, it will be necessary for the customer to screen-share during workshops
