

Solution Accelerator: Bulk Data Import

www.avolutionsoftware.com

ABACUS supports several formats for bulk import. With this Solution Accelerator the Avolution Consultants will import bulk data to populate the repository with data that will be mastered in ABACUS, or that will retain an external ID from the source system for ease of synchronization. Data formats allowed include Microsoft Visio, Microsoft Excel or CSV, including exports from other systems to Excel or CSV files.

This Solution Accelerator grants up to 24 hours of consulting time, including both meeting time and offline work time. Only applicable for data that will be maintained in ABACUS after import. Customers must provide the data to Avolution for import. If data is not provided, the use of this Solution Accelerator is forfeited. For best experience, it is recommended that the Avolution consultant is granted access to customer's ABACUS environment. If access cannot be granted, it will be necessary for the consultant to import the data into another ABACUS file, and the customer must screen-share during a workshop to combine projects.
