

Solution Accelerator: Wide User Training

www.avolutionsoftware.com

Avolution Consultants provide customized training based on customer’s goals, end user role, and modeling needs. Users will understand their processes, where to work in the tool, and how to produce artifacts and update data in service of Enterprise Architecture goals. This Solution Accelerator includes scoping and set up time with the core team, offline training preparation, and up to four workshops of up to 3 hours each, and up to three hours of follow-up Q&A.

This Solution Accelerator is delivered remotely unless otherwise agreed. For best experience, it is recommended that the Avolution consultant is granted access to customer’s ABACUS environment.
