

# Solution Accelerator: Advanced Training

[www.avolutionsoftware.com](http://www.avolutionsoftware.com)

Enhance the capacity of your core team with customized, focused training sessions that dive deep into a topic and apply it directly to your model. First, scope the training to identify topics, then schedule session to dive deep into the topics selected in up to five four-hour workshops (workshops may take place over multiple sessions).

Training for new core team members

Advanced training on configuration

Advanced training on importing

Advanced training on algorithms

Advanced training on Administration

Advanced training on diff/sync

Advanced training on viewpoints

*This Solution Accelerator grants up to five four-hour workshops, which may be delivered over multiple sessions, plus scoping. These topics are presented generically, but the workshops may include follow-up discussion to consider how to apply the principles to the customer's model. Model customizations and feature implementation is not in-scope for this Solution Accelerator. Delivered remotely unless otherwise agreed.*
